Translation Project Coordinator | Localization Operations | LQA

São Paulo, Brazil

Translation and Localization Specialist with **10+ years of experience coordinating multilingual language projects, linguistic QA, content operations, documentation, and quality workflows** across technology, media, and AI environments.

Experienced in supporting **project execution from intake and content preparation through linguistic review, QA, delivery, and documentation**, while balancing multiple priorities, deadlines, quality requirements, and stakeholder needs. Strong background creating **SOPs, style guides, workflows, playbooks, quality checklists, terminology resources, and structured documentation** to improve consistency and scalability.

Combines a background in **Languages & Linguistics and Information Technology**, with hands-on experience using CAT tools, QA platforms, structured content systems, HTML, Excel, AI tools, and digital collaboration environments. Comfortable working independently with international teams across time zones and communicating with linguists, editors, technical teams, and business stakeholders.

PROFESSIONAL EXPERIENCE

Content Governance & Linguistic QA Lead

2020–Present

TeamWorker · Major Telecommunications Client

- Coordinate and quality-review large-scale multilingual **content and localization workflows**, ensuring deliverables meet linguistic, formatting, terminology, and client-specific quality requirements.
- Supported the migration and restructuring of **15,000+ enterprise knowledge assets** across multiple content sources into Salesforce Knowledge, coordinating content standards, information architecture, editorial workflows, and publication requirements.
- Collaborated with **15+ writers and editors**, as well as Process, Communications, technical, and business stakeholders, to maintain consistent workflows and resolve content and operational issues.
- Created and maintained **style guides, editorial standards, formatting guidelines, terminology resources, quality checklists, and workflow documentation** used across the content production process.
- Designed a structured **decision-tree content workflow** that transformed complex procedural information into guided, scenario-based content, improving usability for **30,000+ call-center agents**.
- Worked cross-functionally with Process teams using decision trees and process maps to identify dependencies, consolidate duplicate information, clarify workflows, and improve knowledge-base usability.
- Performed detailed **content preparation, review, validation, and quality control** before publication, ensuring consistency between source information, structure, metadata, formatting, and final deliverables.
- Identified recurring quality and process issues and translated them into standardized rules, documentation, and reusable workflows, supporting **knowledge governance and continuous improvement**.
- Trained and supported contributors in applying editorial standards, documentation requirements, terminology, formatting, and quality-control procedures.

Selected impact: *Improved information retrieval and usability across a knowledge ecosystem supporting 30,000+ agents, while reducing recurring linguistic inconsistencies through systematic QA and governance frameworks.*

Localization QA & Language Quality Specialist

2022–Present

Acclaro

- Performed **multilingual localization QA** for technology and media clients, reviewing localized content against source material, terminology databases, style guides, and client-specific quality standards.
- Reviewed translated **software interfaces, documentation, subtitles, and user-facing content**, validating terminology, locale conventions, formatting, consistency, and linguistic quality before delivery.
- Performed translation review and **MTPE**, identifying accuracy, fluency, terminology, formatting, and cultural adaptation issues.
- Collaborated with international localization teams to investigate linguistic issues, clarify requirements, document edge cases, and support consistent quality decisions.
- Applied structured QA workflows and project guidelines to maintain consistency across high-volume multilingual deliverables.
- Documented recurring issues and contributed to improvements in **quality processes, terminology management, style guides, and reviewer guidance**.

Freelance Translation & Localization Consultant

2015–Present

International Clients · Remote

- Coordinate and deliver multilingual **translation, localization, subtitling, transcription, linguistic QA, and content-review projects** for international clients and language-service providers.
- Manage project requirements independently, including **source-file preparation, terminology research, translation/review, QA, formatting, file validation, and final delivery**.
- Work with multiple language-service workflows and CAT/QA tools, adapting quickly to client-specific platforms, guidelines, file formats, and quality requirements.
- Produce and maintain **style guides, glossaries, terminology resources, QA documentation, and project-specific checklists**.
- Review large volumes of multilingual content while balancing **quality, deadlines, productivity requirements, and changing project priorities**.
- Collaborate remotely with project managers, linguists, editors, QA teams, and technical stakeholders across different time zones.
- Use **ChatGPT and other AI-assisted tools** to accelerate research, content analysis, quality checks, documentation, and workflow preparation while maintaining human linguistic judgment and client requirements.
- Prepare and validate documents in formats including **DOCX, SRT, HTML, XML, JSON, CSV**, adapting files and formatting according to project specifications.

SELECTED PROJECT EXPERIENCE

Enterprise Knowledge Management & Content Migration

15K+ knowledge assets · Salesforce Knowledge · 30K+ users

Restructured complex enterprise content during a large-scale migration, introducing standardized content architecture, decision-tree navigation, editorial guidelines, and cross-functional workflows to improve information retrieval and operational efficiency.

Localization QA & Software Content

Multilingual technology localization · PT-BR

Performed linguistic and functional QA for localized software content, validating terminology, formatting, locale conventions, and user-facing language against source material and project standards.

Audiovisual Localization & Accessibility

Subtitling · Closed Captioning · Translation · QA

Delivered and reviewed audiovisual language projects involving subtitles, captions, transcription, timing, formatting, speaker identification, and cultural adaptation for Brazilian audiences.
